

CALL FOR PAPERS

ICETTME 2022
Aug 19-20, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICETTME 2022 : International Conference on Engineering Textiles and Textile Materials Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Engineering Textiles and Textile Materials Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Engineering textiles
Fabric engineering
Product development and design
Textile fiber-to-fabric engineering
Textile engineering principles and concepts
Textile product development
Textile product design
Textile product design analysis and modeling
Material selection for textile product design

Structure, characteristics and types of fiber for textile product design
Structure and types of yarns for textile product design
Types of fabric for textile product design
Finishing processes for fibrous assemblies in textile product design
Development and applications of fibrous products
Development of traditional textile fiber products
Development of technical textile products
Development of textile fiber products for transportation applications
Development of textile fiber products for medical and protection applications
