

CALL FOR PAPERS

ICWSE 2022
Aug 30-31, 2022
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWSE 2022 : International Conference on Web Systems Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Web Systems Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Web engineering

Web systems engineering and design

Software agent-based applications

Web engineering education

Web application quality, metrics and measurement

Component-based web application development

Web standards, usability, universal accessibility, semantic web

Web knowledge management, web agents, advanced hypermedia

Web engineering for wireless platforms

Web application modeling and engineering

Human computation and crowdsourcing applications

Web applications composition and mash up

Social web applications

Semantic web applications

Web of things applications

Web metrics, cost estimation, and measurement

Personalization and adaptation of web applications

Web quality

Usability of web applications

Web accessibility

Performance of web-based applications

Modeling disciplines

Design manufacturing of steel plant equipments

Process modelling of web applications

Requirements engineering for web applications
