

CALL FOR PAPERS

ICAARFSE 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAARFSE 2022 : International Conference on Advanced Aerospace Robotics and Flight Software Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Aerospace Robotics and Flight Software Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced theoretical models
Advances in aerospace technology
Aeroelasticity and loads
Aerodynamic's fundamental concepts
Aerospace robotics and mechatronics
Flight software engineering and testing
Aerostructures and composites
Aeronautics and astronautics
Aircraft systems
Aircraft design concepts
Applied aerodynamics and fluid mechanics

Aviation human factors
Computational fluid dynamics
Emerging avionics technology
Heat transfer mechanics
Navigation systems
Novel aero engines
Rocket theory and design
Spacecraft avionics systems, subsystems and technologies
Unmanned aircraft technologies
Aerodynamic forces and structural flexibility
