

CALL FOR PAPERS

ICAGEDT 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAGEDT 2022 : International Conference on Applications of Geological Engineering Design Techniques is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Geological Engineering Design Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

| | |
|---|--------------------------------|
| Geological engineering design | |
| Design process | |
| Geology and geological engineering | |
| Geological engineering design techniques | |
| Scientific, technical, and societal challenges | |
| Application of geological engineering design techniques | |
| Creating an appropriate design solution | |
| Geological engineering design projects | |
| Legal, social, and ethical implications | |
| Geosciences and engineering | |
| Slope stabilization methods | |
| | Foundations on unstable slopes |
| | Economic and legal constraints |
| | Environmental concerns |
| | Safety |
| | Aesthetic considerations |
| | Engineering design tools |
| | New paradigms and perspectives |
| | Engineering applications |
| | Future directions |
| | Technological perspectives |
| | Future prospects and trends |
