

CALL FOR PAPERS

ICASDA 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICASDA 2022 : International Conference on Agile Software Development Approaches is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Agile Software Development Approaches. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

| | |
|---|---|
| Agile software development | Evolutions of agile software |
| Agile software development methods | Iterative, incremental and |
| Agile software development processes | evolutionary |
| Agile software development methodologies | Efficient and face-to-face communication |
| The manifesto for agile software development | Very short feedback loop and adaptation cycle |
| Limitations of agile software processes | Quality focus |
| Application life cycle management | Adaptive vs. predictive |
| Agile software development life cycle | Iterative vs. waterfall |
| Agile software development approaches | Code vs. documentation |
| Agile software testing | Agile methods |
| Agile software development for component based software | Agile practices |
| Patterns and practices | Method tailoring |
| Agile principles | Comparison with other methods |
| | Large-scale, offshore and distributed |
