

CALL FOR PAPERS

ICCPSC 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPSC 2022 : International Conference on Cyber Physical Systems Computing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cyber Physical Systems Computing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Automated Testing
Big data model
Certification processes
Cloud computing
Control systems
Crowd-sourcing
Cyber Physical Systems
Cyber Physical Systems Computing
Data mining
Embedded systems
Human computer interactions
Human in the loop systems
Information theory

Intrusion detection
IoT platforms
Machine learning
Mobile computing
Model-based software and systems engineering
Multi-level architectures
Optimization
Participatory sensing
Platforms and Sensor Cloud
Quality and risk models
Real time systems
Risk management
Security and privacy protocols
