

CALL FOR PAPERS

ICCSM 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSM 2022 : International Conference on Chemistry of Superplastic Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemistry of Superplastic Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superplastic materials
Superplasticity in advanced materials
Engineering applications and processing challenges
Novel applications and manufacturing techniques
Superplasticity, characteristics and properties
Mechanical properties of superplastic materials
Chemistry of superplastic materials
Superplasticity metals and ceramics

Superplastic forming methods, techniques and technologies
Superplastic forming of metals
Theoretical and experimental investigation of superplastic processes
Superplastic forming of "commercial purity" aluminium
High strain rate superplasticity in metal-matrix composites
Heating functionality of Superplastic materials
Healing functionality of Superplastic materials
Sensing functionality of Superplastic materials
