

# CALL FOR PAPERS

**ICEERE 2022**  
**Aug 16-17, 2022**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEERE 2022 : International Conference on Electrical Engineering for Renewable Energy is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrical Engineering for Renewable Energy. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrical engineering and  
renewable energy systems  
Transforming renewable energy to  
electricity  
Renewable source-powered  
generations  
Analysis and design of control  
systems  
Power electronics and drives  
Energy management and conservation  
Energy in buildings  
Grid-connected microgeneration  
systems

Electric power generation by  
renewable sources  
Control systems design  
Next generation silicon  
technologies  
Micro- and nano-electromechanical  
systems  
Power electronics and drives  
Electric drives  
Programming for renewable energy  
systems
