

CALL FOR PAPERS

ICGMFC 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMFC 2022 : International Conference on Genetically Modified Foods and Crops is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Genetically Modified Foods and Crops. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Genetically modified foods and organisms
Nano-engineered foods
Second green revolution: the role of genetically modified food
Genetically modified crop and livestock production
Cases for and against genetically modified food
Corn starch and starch sugars, including syrups
Recombinant food-grade organisms for healthcare
Food, public health and food policy
Food supplements and food labels
Food quality and management
Nutrition and nutritional management
Current trends and research in nutrition and food science
Changes in food components during fermentation

Food biochemistry and food microbiology
Genetically modified foods
Antioxidants and lipid oxidation in foods
Bioactive constituents, micronutrients, food additives and ingredients
Analytical methods for food components
Enzymatic reactions in foods
Functional foods and functionality
Food contamination and toxic components
Foodborne infections and diseases
Food safety and control
Food technology
Food processing and packaging technologies
Food and bioprocess technology
