

CALL FOR PAPERS

ICGMMDD 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMMDD 2022 : International Conference on Ground Motion Measurement and Data Digitization is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ground Motion Measurement and Data Digitization. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ground motion measurement
Strong ground motion
Seismographs
Data acquisition and digitization
Strong-motion processing
Strong-motion instrument arrays
Strong-motion records
Ground motion parameters
Amplitude parameters
Frequency content parameters

Duration
Other measures of ground motion
Estimation of ground motion parameters
Magnitude and distance effects
Development of predictive relationships
Estimation of amplitude parameters
Estimation of frequency content parameters
Estimation of duration
Estimation of other parameters
Spatial variability of ground motions
