

CALL FOR PAPERS

ICMISO 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMISO 2022 : International Conference on Marine Informatics and Satellite Oceanography is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Informatics and Satellite Oceanography. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine informatics
Marine geoinformatics
Coastal marine informatics
Marine image analysis and management
Marine geographical information science
Seabed characterization, dynamics and modelling
Data visualization
Exploration geodynamics and interactive inversion

Satellite oceanography and marine informatics
Indicators and informatics for marine ecosystems
Indicators of sustainable ecosystems
Marine integrated ecosystem assessments
Distribution and recovery of data streams from various sources
Analysis of large amounts of data from various data sources
Digital platforms for information and service interaction
