

CALL FOR PAPERS

ICRAPM 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRAPM 2022 : International Conference on Recent Advances in Proteomics Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Proteomics Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sample preparation methods
Label-free and isotopic labeling
strategies for LC-MS/MS
Role of
miniaturization/amplification
strategies
Protein recognition based
approaches
Whole proteome coverage
Software development for handling
and interpreting MS data

MRM: development and applications
Post-translational modifications:
to phosphorylation and beyond
Advances in MS instrumentation
Proteomics databases: data storage
and sharing, data re-analysis
Statistical approaches and novel
algorithms
Methods and instrumentation for
taking proteomics to clinical
utility
