

CALL FOR PAPERS

ICSB 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSB 2022 : International Conference on Systems Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Systems Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biological morphology	Morphogenesis
Cell regulation	Network biology
Cell regulation - signalling	Network Structure and Regulation
Cell regulation-metabolism	New approaches to biotechnology
Cell-to-cell variation	Plant systems
Data generation and experimental design	Software tools
Diagnostic markers for complex diseases	Standards and repositories
Drug discovery	Synthetic Biology
From cell to organ to organism to population	Systems Bioinformatics
Genetic variation and evolution	Systems Biomedicine
Microbial systems	Understanding and curing diseases
Modelling approaches
