

CALL FOR PAPERS

ICSDMMT 2022
Aug 16-17, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSDMMT 2022 : International Conference on Software Design Methods, Methodology and Techniques is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Design Methods, Methodology and Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Software design methods Strategies
- Structured design
- Function oriented design
- Design process
- Object oriented design
- Design process
- Software design approaches
- Top down design
- Bottom-up design
- Software design complexity
- Software implementation
- Structured programming

- Functional programming
- Programming style
- Data elements
- Data store
- Data processing
- Software design levels
- Modularization
- Concurrency
- Cohesion
- Coupling
- Design verification
