

# CALL FOR PAPERS

**ICTSMT 2022**  
**Aug 16-17, 2022**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTSMT 2022 : International Conference on Traffic Safety Methodologies and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Traffic Safety Methodologies and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Safety implications and evaluation  
of advanced driving assistance  
systems  
Data-driven traffic safety  
monitoring, assessment, and  
improvement  
Methodological advancement in  
traffic safety modelling  
Current, transitional, and future  
dynamic traffic network simulation

Safety performance assessment  
between conventional, connected,  
and automated vehicles  
Innovative traffic safety data  
collection, analyzing, and molding  
using advanced technologies  
Advanced traffic safety management  
strategies and policies
