

CALL FOR PAPERS

ICAPACM 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPACM 2022 : International Conference on Advances in Pure, Applied and Computational Mathematics is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Pure, Applied and Computational Mathematics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Algebra and its applications
Approximation theory
Artificial intelligence
Biometrics
Coding theory
Combinatorics
Complex variables
Computational fluid dynamics
Control theory
Cryptology and cryptography
Data mining and its applications
Database and information
theory/system
Decision support systems

Discrete mathematics
Dynamical systems
Educational mathematics
Financial mathematics
Fourier and wavelet transforms
Functional analysis
Fuzzy and rough set theory
Game theory
Graph theory and its applications
Group and module theory
Image and signal processing
Integral equations
Lattices, algebraic structures
