

CALL FOR PAPERS

ICBBS 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBBS 2022 : International Conference on Biofuels and Biorefining Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biofuels and Biorefining Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Objectives of using biofuels
Biorefining technologies
Biogas
Large scale biogas production and challenges
Biogas technologies
Market potential of biogas reactors
Biogas from agriculture waste
Biogas production from algae
New and possible substrates for biogas production
Measuring and upgrading biogas environment
Culturing algae
Algae harvesting and oil extraction systems
Algal production systems and cost effectiveness

Wastewater based algae biofuel production
Genetic engineering in algae to increase productivity
Commercialization of algae biofuels
Algal biosequestration
Biodiesel
Biodiesel production from municipal waste
Cost effective techniques and scale up strategies for biodiesel production
Biodiesel as automobile fuel
Enzymatic production of biodiesel
Applications and environment impact of biodiesel
Market opportunities
Crops for biodiesel production
Bioalcohols
