

# CALL FOR PAPERS

**ICCDMCDNA 2022**  
**Sep 06-07, 2022**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCDMCDNA 2022 : International Conference on Context-Dependent Memory and Context-Dependent Neuronal Activity is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Context-Dependent Memory and Context-Dependent Neuronal Activity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Context-dependent memory  
Environmental context-dependent memory  
Environmental reinstatement effect  
Long-term reinstatement effects  
Short-term reinstatement effects  
The outshining hypothesis  
State-dependent learning  
Language of discourse  
Mood-congruent and mood-dependent memory  
Mood-congruent memory  
Mood-dependent memory  
Context-dependent forgetting

Context-dependent retrieval processes  
Context recall technique  
Multiple learning context technique  
Background music and context-dependent memory  
Attention  
Ambient and transferable cues  
Context-dependent extinction  
Context-dependent memory under stressful conditions  
Context-dependent memory for meaningful material  
Clinical applications  
Neuroanatomy and context-dependent neuronal activity
