

# CALL FOR PAPERS

**ICCMS 2022**  
**Sep 06-07, 2022**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMS 2022 : International Conference on Carbon Management and Sequestration is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Carbon Management and Sequestration. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Carbon management  
Carbon pollution prevention and management  
Carbon pollution emission  
Carbon footprint  
Carbon footprints and sustainable solutions  
Carbon footprint of energy generation  
Low carbon technologies  
Sources of carbon emissions  
Solutions and sustainable actions

Climate change and global warming  
Rules, procedures and policies for carbon management  
Carbon management policy planning and implementation  
Carbon footprint analysis and management  
Technological and engineering measures for carbon sequestration  
Carbon mitigation analysis  
Carbon emission management technologies  
Information and communication technologies for carbon management
