

CALL FOR PAPERS

ICDCTL 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDCTL 2022 : International Conference on Dual Coding Theory and Learning is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dual Coding Theory and Learning. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dual coding theory and education
Types of codes
Imagery and verbal mental representations
Imagery processes in school learning
Dual coding theory and effective instruction
Dual coding theory and educational testing
Learning and memory
Processing assumptions and processing operations

Unit- and system-level organization
Associative structure of knowledge
Dual coding theory and the mental lexicon
Evidence from psychological research
Cognitive neuroscience supports
Dual coding theory in reading
Alternative theory and propositional representation
