

CALL FOR PAPERS

ICDLTIF 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDLTIF 2022 : International Conference on Deep Learning Techniques for Information Fusion is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Deep Learning Techniques for Information Fusion. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

New models for multimodal deep learning
Deep learning models for multimodal sensing and processing
Multi-sensor fusion with deep learning
Feature fusion using deep learning models
Shared representation learning
Combining multiple sources in deep learning
Combining multiple deep learning models

Joint deep feature learning
Cross modality learning
Hierarchical deep learning models for information fusion
Transfer learning in multimodal deep learning
Multimodal deep metric learning
Applications of multimodal deep learning in image and computer vision related areas such as object recognition, biometrics, forensics and medical data analysis
Applications of multimodal deep learning in text related areas such as natural language processing, and image to text generation
