

# CALL FOR PAPERS

**ICERDS 2022**  
**Sep 06-07, 2022**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICERDS 2022 : International Conference on Earthquake Resistant Design of Structures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Earthquake Resistant Design of Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Earthquake resistant structures  
Earthquake engineering for structures  
Seismic design and retrofitting techniques for structures  
Seismic resistant techniques  
Seismology and seismic engineering  
Modern earthquake engineering  
Seismology and earthquake effects  
Seismic response of structures  
Risk assessment, mitigation, and remediation

Tsunamis, earthquakes, and nuclear power  
Structural design and retrofit  
Seismic bridge design  
Bridge seismic retrofit methods for seismic events  
Seismic design for buildings  
Performance-based design and retrofit methods for buildings  
Computer software for seismic analysis and design  
Seismic analysis problems
