

CALL FOR PAPERS

ICGP 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGP 2022 : International Conference on Geotechnics and Problems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnics and Problems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnics
Applied geotechnics
Current research and problems
Geotechnical engineering
Earth materials and engineering applications
Soil mechanics and rock mechanics
Geology, geophysics, and hydrology
Prediction, prevention or mitigation of natural hazards
Application of soil, rock and groundwater mechanics

Design and predicted performance of earthen structures
Design and performance prediction of the foundations of structures
Environmental geotechnics
Marine geotechnics
Biomediated and bioinspired geotechnics
Ground engineering
Geotechnical site investigation
Engineering geology
Geotechnics, rock mechanics and hydrology
