

CALL FOR PAPERS

ICMMA 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMA 2022 : International Conference on Marine Microalgae and their Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Microalgae and their Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine microalgae	Bioethanol production from microalgae
Marine microalgae biotechnology	Medicinal effects of microalgae-derived fatty acids
Microalgae diversity and cell structure	Microalgal nutraceuticals
Microalgae as a potential source for fuels and chemicals	Production of biopharmaceuticals in microalgae
Storage mechanism and genetic modification potential of microalgae	Applications of microalgae-derived active ingredients
Techno-economic impact and commercialization potential of microalgae species	Supercritical fluid extraction of microalgae biomass
Microalgae isolation and basic culturing techniques	Genetic engineering of marine microalgae
Mass production of microalgae	Microalgae-based wastewater treatment
Microalgae screening and isolation techniques	Microalgae-derived toxic compounds
Biofuel production from microalgae
