

# CALL FOR PAPERS

**ICSMS 2022**  
**Sep 06-07, 2022**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMS 2022 : International Conference on Spacecraft Materials and Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Spacecraft Materials and Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Spacecraft engineering  
spacecraft engineering and applications  
Advances in spacecraft engineering  
computer applications and simulation technology  
Design of spacecraft systems  
Development of environmental simulation equipment  
Earth observation satellites  
Effects of ionising radiation on electronics and other materials  
Energetic particles and ionising radiation  
Environmental simulation  
Lunar exploration satellites  
Magnetic test and control technology  
Manned spaceship

Measuring instruments carried on spacecrafts  
Micrometeorites  
Navigation satellites  
Pollution detection and control technology  
Protons, electrons, ultraviolet radiation integrated environmental test technology  
Science experiment satellites and recoverable satellites  
Space environment and spacecraft engineering  
Space environmental effects and protection technology  
Space environments and effects  
Space environments and spacecraft effects organization  
Spacecraft design and system engineering  
Spacecraft dynamic environments  
Spacecraft environment engineering
