

# CALL FOR PAPERS

**ICWPACT 2022**  
**Sep 06-07, 2022**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWPACT 2022 : International Conference on Wildlife Population Assessment and Control Techniques is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wildlife Population Assessment and Control Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wildlife populations  
Global wildlife populations  
Management of animal populations  
Wildlife population ecology  
Wildlife population assessment  
Wildlife population control techniques  
Estimating wildlife populations  
Estimation methods  
Sampling methods  
Models for management of wildlife populations  
Population density  
Hunting or trapping seasons  
The impact of disease on wildlife populations

Wildlife demography and analysis  
Food and energy demand  
Conservation of wildlife populations  
Wildlife population health specialty  
Wildlife population growth rates  
Demography and genetics  
Specific groups of wildlife  
Human dimensions  
Policy and economics  
Total counts  
Incomplete counts  
Indirect counts  
Mark-recapture methods
