

# CALL FOR PAPERS

**ICBCR 2022**  
**Sep 27-28, 2022**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBCR 2022 : International Conference on Biomaterials Chemistry and Research is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biomaterials Chemistry and Research. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biomaterials chemistry  
Supramolecular and biomaterials chemistry  
Structure analysis of biomaterials  
Chemical synthesis of biomaterials  
Functionalization of biomaterials  
Synthetic carbohydrate chemistry  
Bioorganic chemistry  
Supramolecular chemistry  
Synthetic organic chemistry  
Natural product chemistry  
Marine natural product chemistry  
Chemical ecology  
Advanced biomaterials, biodevices and biotechnology

Advanced ceramics: synthesis, properties, and applications  
Advanced materials characterization and modeling  
Advanced materials for solar energy conversion  
Advances in surface science and engineering  
Carbon-based nanomaterials and applications  
Fundamental science of materials  
Materials on biomedical science  
Materials on energy science  
Materials on environmental science  
Multidisciplinary materials  
Nonlinear electric and optical materials, properties and applications  
Thin films and nanostructures of functional materials
