

CALL FOR PAPERS

ICSEES 2022
Sep 20-21, 2022
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEES 2022 : International Conference on Sustainable Energy and Environmental Sensing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable Energy and Environmental Sensing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sustainable Energy:

Energy management

Global warming

New perspectives of renewable energy

Low energy architecture and energy efficiency

Energy saving in buildings

Renewable energy economics

Energy storage

Energy transformation from renewable energy system to grid

Sustainable energy research and applications for industry 4.0

Sustainable energy for electrical vehicles and components

Artificial intelligence and machine learning studies for sustainable energies and applications

Computational methods for sustainable energies

Energy savings for vehicular technology, power electronics, electric machinery and control

Safety and security

Renewable energy systems in smart cities

Energy resources technologies

Environmental impact and sustainability

Environment Sensing:

Remote sensing of environment

Agriculture and food security

Atmosphere, weather and climate

Natural disasters monitoring, warning and response

Geology

Water cycle
