

CALL FOR PAPERS

ICCCMCI 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCMCI 2022 : International Conference on Code Configuration Management and Configuration Items is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Code Configuration Management and Configuration Items. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Code configuration management	Configuration item identification
Software configuration management strategies	Configuration identification
Configurable item identification and management	Identifying configurations
Configuration management system	Configuration control
Interface configuration management	Configuration status accounting
Code configuration management activities	Configuration requirements, architectural specifications and user manuals
Promotion management	Build management
Release management	Process management
Change management	Environment management
Branch management	Managing the software and hardware that host the system
Variant management	Teamwork
Software configuration management plans	Defect tracking
