

CALL FOR PAPERS

ICCDMCDNA 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCDMCDNA 2022 : International Conference on Context-Dependent Memory and Context-Dependent Neuronal Activity is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Context-Dependent Memory and Context-Dependent Neuronal Activity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Context-dependent memory
Environmental context-dependent memory
Environmental reinstatement effect
Long-term reinstatement effects
Short-term reinstatement effects
The outshining hypothesis
State-dependent learning
Language of discourse
Mood-congruent and mood-dependent memory
Mood-congruent memory
Mood-dependent memory
Context-dependent forgetting

Context-dependent retrieval processes
Context recall technique
Multiple learning context technique
Background music and context-dependent memory
Attention
Ambient and transferable cues
Context-dependent extinction
Context-dependent memory under stressful conditions
Context-dependent memory for meaningful material
Clinical applications
Neuroanatomy and context-dependent neuronal activity
