

CALL FOR PAPERS

ICFMLEA 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFMLEA 2022 : International Conference on Fiber Metal Laminates and Engineering Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Fiber Metal Laminates and Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Fiber metal laminates
Commercial and experimental fiber metal laminates
General-purpose fiber metal laminates
High strength fiber metal laminates
Fiber metal laminate manufacturing and production
Recycling and reuse of fiber metal laminates
Fiber metal laminate reinforcement
Fiber metal laminates for engineering applications
Atomic structure and structural stability of fiber metal laminates
Structural modeling of fiber metal laminates
Test methods of fiber metal laminate composites
Fiber-metal laminate manufacturing techniques

Fabrication of fiber-metal laminates with non-autoclave processes
Modelling and simulation of fiber metal laminates
Damage tolerance and durability of damage tolerance and durability of fiber-metal laminates
Fiber metal laminates properties
Physical properties of fiber metal laminates
Chemical resistance of fiber metal laminates
Electrical properties of fiber metal laminates
Thermal properties of fiber metal laminates
Optical properties of fiber metal laminates
Radiation properties of fiber metal laminates
Mechanical properties of fiber metal laminates
