

# CALL FOR PAPERS

**ICGP 2022**  
**Sep 06-07, 2022**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGP 2022 : International Conference on Geotechnics and Problems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnics and Problems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnics  
Applied geotechnics  
Current research and problems  
Geotechnical engineering  
Earth materials and engineering applications  
Soil mechanics and rock mechanics  
Geology, geophysics, and hydrology  
Prediction, prevention or mitigation of natural hazards  
Application of soil, rock and groundwater mechanics

Design and predicted performance of earthen structures  
Design and performance prediction of the foundations of structures  
Environmental geotechnics  
Marine geotechnics  
Biomediated and bioinspired geotechnics  
Ground engineering  
Geotechnical site investigation  
Engineering geology  
Geotechnics, rock mechanics and hydrology
