

CALL FOR PAPERS

ICGSM 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGSM 2022 : International Conference on Geotechnical and Structural Monitoring is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnical and Structural Monitoring. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical monitoring
Geotechnical monitoring for structures
Basic concepts of monitoring and planning
Geotechnical and structural instrumentation
Monitoring projects and methods
Evaluation, presentation and interpretation of monitoring data
Geotechnical safety management plan
Contact monitoring methods
Remote monitoring methods

Vibration monitoring
Offshore monitoring
Management, analysis and interpretation of data
Piezometers, inclinometers, extensometers and total stations
GNSS and terrestrial radar
Contact monitoring
Remote monitoring
Offshore monitoring
Data transmission and management
