

CALL FOR PAPERS

ICMAB 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMAB 2022 : International Conference on Molecular and Applied Biotechnology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Molecular and Applied Biotechnology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Molecular biotechnology
Application of molecular biology
Stability and expression of cloned gene products
Cell transformation
Gene cloning systems
Production of recombinant proteins
Protein purification and analysis
Transgenic species
Developmental biology
Mutation analysis
Applications of DNA fingerprinting

RNA interference, and PCR technology
Microarray technology
Proteomics
Mass spectrometry
Bioinformatics
Plant molecular biology
Microbial genetics
Gene probes and diagnosis of disease
Pharmaceuticals, therapeutic agents, vaccines, gene targeting, gene therapy, stem cell technology and tissue engineering
Antisense technology, protein engineering and enzyme technology
Monoclonal antibodies, glycobiology and glycomics, and agricultural biotechnology
