

CALL FOR PAPERS

ICMABA 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMABA 2022 : International Conference on Marine Algae Biotechnology and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Algae Biotechnology and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine algae biotechnology
Molecular biotechnology of marine algae
Biotechnological applications of microalgae
Marine macro algae communities under natural conditions
Marine macroalgae and assessment of ecological conditions
Exotic and invasive species
Marine algae as carbon sinks and allies to combat global warming
Marine micro algae
Marine algae culture
Applications of macro algae in animal feeds
Marine algae and biofuels
Marine algae biotechnology
Taxonomy, biology, ecology and biodiversity of algae

Physiology, cultivation, bioprocesses and biotechnology
Algae and the environment
Algal omics and applications
Algal biorefinery and industrial trends
Food, feed, nutraceuticals and pharmaceuticals
Large scale algal bioprocesses
Extraction and conversion of microalgal lipids
Applications of algae in food and feed
Algae based technology to treat industrial effluents
Algal farming for biofuels and other valuable products
Bio-remediation using algae
Process models and techno-economic assessments
Human health, nutrition, personal care
