

CALL FOR PAPERS

ICMMA 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMA 2022 : International Conference on Marine Microalgae and their Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Microalgae and their Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|--|---|
| Marine microalgae | Bioethanol production from microalgae |
| Marine microalgae biotechnology | Medicinal effects of microalgae-derived fatty acids |
| Microalgae diversity and cell structure | Microalgal nutraceuticals |
| Microalgae as a potential source for fuels and chemicals | Production of biopharmaceuticals in microalgae |
| Storage mechanism and genetic modification potential of microalgae | Applications of microalgae-derived active ingredients |
| Techno-economic impact and commercialization potential of microalgae species | Supercritical fluid extraction of microalgae biomass |
| Microalgae isolation and basic culturing techniques | Genetic engineering of marine microalgae |
| Mass production of microalgae | Microalgae-based wastewater treatment |
| Microalgae screening and isolation techniques | Microalgae-derived toxic compounds |
| Biofuel production from microalgae | |
