

CALL FOR PAPERS

ICRMA 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRMA 2022 : International Conference on Refractory Metals and Engineering Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Refractory Metals and Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Refractory metals
Sustainable refractory metals
Special-purpose refractory metals
Tungsten, refractory and hard materials
Refractory metal alloys
Titanium and titanium alloys
High temperature refractory metals
Refractory metal evaluation and processing
High performance refractory metals
Refractory metals for engineering applications
Tensile and compression properties of refractory metals
Mechanical and dynamic mechanical analysis of refractory metals
Commercial and experimental refractory metals

High strength refractory metals
Atomic structure and structural stability of refractory metals
Structural modeling of refractory metals
Classification of refractory metals
Processing, markets and applications of refractory metals
Structure of refractory metals
Mechanical properties of refractory metals
Thermal properties of refractory metals
Refractory metals and processing
Refractory metals for aerospace applications
The latest characterization techniques of refractory metals
Function developments and application potentials
