

CALL FOR PAPERS

ICSMP 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMP 2022 : International Conference on Synoptic Meteorology and Principles is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Synoptic Meteorology and Principles. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Synoptic meteorology
Synoptic scale meteorology
Principles of synoptic meteorology
Synoptic method
Scales of atmospheric motion
Synoptic scale process analysis and short-range weather forecasting
Surface weather analysis
Extratropical cyclone
Surface high-pressure systems

Weather fronts
Dynamics, analysis and forecasting
Atmospheric dynamics
Weather analysis and forecasting
Synoptic meteorology technology and meteorology
Some weather forming features of the meteorological magnitude fields
Cyclones and anticyclones
Synoptic situation and synoptic process
