

CALL FOR PAPERS

ICSNFC 2022
Sep 06-07, 2022
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSNFC 2022 : International Conference on Sustainable and Natural Fiber Composites is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainable and Natural Fiber Composites. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Natural fiber composites
Natural fiber composite materials
Sustainable natural fiber composites
Wood based composites
Bamboo based composites
Other plant fiber composites
Bioresins and biopolymers derived from natural resources
Fiber treatment and resin modification for biocomposites
Cellulose and nanocellulose composites
Natural fiber composite fabrication, characterization, evaluation, and application
Life cycle assessment
Natural fiber sources
Alternative fiber sources

Natural polymer sources
Natural fiber fiber thermoplastic composites
Re-use, recycling and degradation of composites
Reprocessing of composites
Recent developments in natural fiber composites based on plant fibers
Natural fiber composites from natural resources
Natural fiber composite material evaluation and processing
High performance natural fiber composites
Natural fiber composites for engineering applications
Hybrid natural fiber composites
Tensile and compression properties of natural fiber composites
Mechanical and dynamic mechanical analysis of natural fiber composites
Commercial and experimental natural fiber composites
