CALL FOR PAPERS

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTIIT 2022 : International Conference on Traffic Informatics and Information Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Traffic Informatics and Information Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Traffic informatics
Road traffic informatics
Sustainable logistics and strategic traffic planning
Data analytics for intelligent traffic systems
Artificial intelligence techniques in traffic studies
Big data analytics for traffic and logistics
Big data analytics in traffic operations

Informatics utilization in public traffic
Applications of analytics to traffic safety
Big data analytics in traffic safety
Connected vehicles and big data applications
Urban and regional information systems
Urban traffic systems
