

CALL FOR PAPERS

ICNMME 2022
Sep 09-10, 2022
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNMME 2022 : International Conference on Nanostructured Materials and Materials Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanostructured Materials and Materials Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanostructured materials	
Nanostructured materials and microstructure	
Nanostructured materials for engineering applications	
Nanostructured materials for advanced technological applications	
Physics of nanostructured materials	
Nanostructured materials and nanotechnology	
Synthesis of nanostructured materials	
Carbon-based nanomaterials	
Magnetic properties of nanomaterials	
Mechanical properties of nanomaterials	
	Electrochemical processing of nanostructured materials
	Sputtered multilayer nanoscale magnetic films
	Electromagnetic properties of multilayer nanoscale films
	Nanophotonic materials
	Nanobiotechnology and nanotechnology
	Nanocomposites
	Nanoelectronics, devices and sensors
	Nanofunctional materials
	Nanotoxicology, nanometrology, and nanomagnetism
