

# CALL FOR PAPERS

**ICEHCM 2022**  
**Sep 20-21, 2022**  
**Toronto, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEHCM 2022 : International Conference on Environmental Health in Clinical Medicine is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Environmental Health in Clinical Medicine. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Adverse chemical exposures and human health  
Adverse biological exposures (such as mold) and human health  
Electromagnetic radiation exposure and human health  
Human nutrition and biochemistry relating to environmental health sciences  
Investigations to assess exposures and bioaccumulated toxicants  
Assessment of body burden of bioaccumulated toxicants  
Interventions to address bioaccumulated toxicants  
Public policy issues related to human health and the environment  
Environmental design and architecture  
Industry and human health

Government regulation and adverse human exposures  
Precautionary principle  
Effective knowledge translation of environmental science, and impediments to the same  
Public education regarding environmental health sciences  
Radiation exposure and human health  
Physical activity and detoxification  
Personal lifestyles and susceptibility to environmental hazards  
Toxicants as determinants of obesity, insulin resistance, and diabetes  
Future strategies
