

# CALL FOR PAPERS

**ICPANA 2022**  
**Sep 23-24, 2022**  
**Vancouver, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPANA 2022 : International Conference on Properties and Applications of Nickel Alloys is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Properties and Applications of Nickel Alloys. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nickel alloys  
Nickel alloy materials  
Sustainable nickel alloys  
Special-purpose nickel alloys  
Nickel alloy material evaluation and processing  
High performance nickel alloys  
Nickel alloys for engineering applications  
Tensile and compression properties of nickel alloys  
Mechanical and dynamic mechanical analysis of nickel alloys  
Commercial and experimental nickel alloys  
High strength nickel alloys

Atomic structure and structural stability of nickel alloys  
Structural modeling of nickel alloys  
Classification of nickel alloys  
Processing, markets and applications of nickel alloys  
Structure of nickel alloys  
Mechanical properties of nickel alloys  
Thermal properties of nickel alloys  
Nickel alloys and processing  
Nickel alloys for aerospace applications  
The latest characterization techniques of nickel alloys  
Function developments and application potentials
