

# CALL FOR PAPERS

**ICHMC 2022**  
**Oct 21-22, 2022**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHMC 2022 : International Conference on Hybrid Materials Chemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hybrid Materials Chemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hybrid materials	Multifunctional hybrid materials
Hybrid materials and chemistry	based on conducting organic
Advanced composites and hybrid	polymers
materials	Multifunctionality in hybrid
Hybrid composite materials	materials
Inorganic/organic hybrids	Hybrid organic-inorganic
Hybridization of functions	electronics
New classification of hybrid	Bioactive sol-gel hybrids
materials	Nanotechnology
Hybrid materials, functional	Interfacial science and
applications	engineering
Organic-inorganic materials	Advanced manufacturing
Nanostructured hybrid	Catalysis
organic-inorganic materials	Bioengineering
Porous inorganic-organic hybrid	Sensing and actuation
materials	Energy, and environmental
Optical properties of functional	applications
hybrid organic-inorganic	Atomic/molecular level engineering
nanocomposites	Self-assembly
Electrochemistry of sol-gel derived	
hybrid materials
