

CALL FOR PAPERS

ICMS 2022
Oct 21-22, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMS 2022 : International Conference on Metropolitan Sustainability is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Metropolitan Sustainability. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Metropolitan sustainability	Metropolitan effects on atmospheric patterns
Planning for metropolitan sustainability	Rainwater harvesting
Metropolitan planning strategies	Water and wastewater treatment
Urban energy systems	Waste-to-energy in urban infrastructure
Urban energy infrastructure	Smart energy for cities
Benefit cost analysis for environment	Bioenergy for the urban environment
Industrial ecology, materials flow and life cycle analysis	Conversion technologies and bioenergy sustainability
The urban heat island effect: causes and potential solutions	Sustainable urban mobility and land use
Global climate effects	Metropolitan accessibility and transportation sustainability
Air pollution in the urban atmosphere: sources and consequences	Sustainable building design
Site availability for urban agriculture	Future trends
Ecological performance of building-integrated agriculture
