

# CALL FOR PAPERS

**ICWESM 2022**  
**Oct 21-22, 2022**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWESM 2022 : International Conference on Waste to Energy Systems Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Waste to Energy Systems Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Waste to energy systems  
Waste to energy conversion  
technology  
Energy supply and waste management  
Air quality and residue management  
considerations  
Environmental impacts of waste to  
energy  
Waste to energy plants

Thermal and non-thermal  
technologies  
Modeling waste to energy systems  
Basic combustion system  
Waste composition methodology  
Gasification-based waste to energy  
units  
Waste flow control
