

CALL FOR PAPERS

ICACC 2022
Oct 25-26, 2022
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACC 2022 : International Conference on Advances in Chemical Cybernetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Chemical Cybernetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemical cybernetics
Advances in chemical cybernetics
Chemical processes and systems
Chemical cybernetics, modeling and simulation
Chemical technologies
Chemical processing and design
Theoretical and computational chemistry
Quantum chemistry: developments and applications
Molecular dynamics of biomolecules
Modeling mechanisms of enzymatic reactions

Modeling photochemistry and photobiology
Molecular spectroscopy
Hydrogen-bonded systems
Modern computer architectures
Parallel computations and grid technologies
Thermodynamics
Molecular systems and interactions
Computer-aided design
Control system in chemical engineering
Physical chemistry
