

CALL FOR PAPERS

ICAPSC 2022
Oct 25-26, 2022
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPSC 2022 : International Conference on Advanced Power Systems and Components is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Power Systems and Components. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Power systems
Advanced signal processing for smart grids
Micro-grids and nano-grids
Energy storage devices and systems
Capacitors and reactors
Transmission and distribution
Power system analysis, modeling, control and stability, protection and operations
Distributed generation
Micro electro-mechanical systems

Thermodynamics
Fluid machinery
Theory of machines
Materials science and technology
Circuit theory and network
Electrical machines
Combustion engines
Materials for power engineering
