

CALL FOR PAPERS

ICNGEPST 2022
Oct 06-07, 2022
Beijing, China

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNGEPST 2022 : International Conference on Natural Gas Engineering: Production, Storage and Transportation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Natural Gas Engineering: Production, Storage and Transportation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Natural gas processing
Natural gas production
Natural gas transportation
Natural gas exploration, drilling,
and well completion
Liquefied natural gas
Natural gas storage
Natural gas supply
Origin and accumulation of natural
gas
Natural gas geochemistry
Gas-reservoir engineering
Well logging, testing and
evaluation
Mathematical modelling

Enhanced gas recovery
Thermodynamics and phase behavior
Gas-reservoir modelling and
simulation
Natural gas production engineering
Primary and enhanced production
from unconventional gas resources
Coalbed methane, tight gas, shale
gas, and hydrate production
Formation evaluation, exploration
methods, multiphase flow and flow
assurance issues
Novel processing techniques
Raw gas transmission methods
Gas processing/LNG technologies
Sales gas transmission and storage
