

CALL FOR PAPERS

ICCENMS 2022
Oct 28-29, 2022
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCENMS 2022 : International Conference on Chemical Engineering, Nanoscience and Materials Science is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical Engineering, Nanoscience and Materials Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Material engineering and chemical engineering
Nanoscience and nanotechnology for innovative materials
Development of innovative materials through nanoscience and nanotechnology
Chemistry, nanoscience and materials science
Chemical engineering
Science and engineering of oxide materials and nanomaterials
Chemistry and engineering of organic substances and petrochemistry
Polymer science and engineering
Food chemistry and biochemical technologies
Engineering and informatics for chemical and biochemical processes
Economic engineering in chemical and materials industry
Engineering and environment protection in chemical and petrochemical industries
Control and expertise of food products

Chemistry
Analytical chemistry
Inorganic chemistry
Biochemistry
Physical chemistry
Organic chemistry
Heterocyclic chemistry
Science and chemistry education
Environmental chemistry
Food chemistry
Metals and materials chemistry
Agricultural chemistry
